Education

University of California, Berkeley — Berkeley, CA
B.S. Mechanical Engineering, GPA: 3.52 — *Expected May 2029*

- **Relevant Coursework:** Solid Mechanics, Ocean Environmental Mechanics, Intro to Python & MATLAB, Linear Algebra & Differential Equations, Multivariable Calculus, Ethics for Engineering, Leadership and Decision Making

Work Experience

Enhanced Radar (YC W25) — Feb. 2026 – May 2026
Mechanical Engineer — *San Francisco, CA*

- Manufactured and deployed $100K+ worth of SDR-based radar receiver systems across 80+ major U.S. airports
- Designed aluminum sheet metal mounts to optimize box fit and airflow, reducing internal enclosure temp by 10°C
- Reduced receiver enclosure weight 29% (28 → 20 lbs) through iterative mechanical redesign, easing deployment
- Iterated on enclosure designs across 6 hardware revisions based on field data, reducing field failure rate by 65%
- Configured, tested, and verified 80+ receiver units, achieving 90% uptime over 4 months of continuous field use

ELDÆON — Jan. 2026 – Apr. 2026
Mechanical Engineering Intern — *Berkeley, CA*

- Shrank Nemsis radar housing volume 30% via a SolidWorks redesign into a 5-part snap-fit stack with 4 fasteners
- Lowered Pi 5 housing temp 8°F via root cause analysis, adding a vent and fan and testing 7 composite materials
- Engineered a 360° servo-driven antenna mount, cutting cost 20% via a trade study of 2 servo and bearing setups
- Cut prototype rebuilds 40% (5 → 3) by validating 10+ concepts in SolidWorks structural and thermal FEA
- Led PDR briefing to the CEO on housing design, manufacturing risks, and test data, securing approval to proceed

United States Navy Reserve — Jul. 2024 – Present
Naval Aircrewman Mechanical (E-5) — *Point Mugu, CA*

- Maintained 90% readiness over 166 flight hours on a $65M C-130T in support of Carrier Strike Groups and NSW
- Verified critical weight and balance data, ensuring 100% compliance with safety protocols and technical directives
- Served as Second Loadmaster, overseeing aircraft systems and cargo bay configuration across 25+ operations
- Ensured the secure transport of 200 tons of high-value equipment and transfer of 10k lbs of fuel in aerial refueling
- Monitored and troubleshot three 3,000 PSI hydraulic systems and flight controls in time-critical flight conditions

Leadership & Activities

Formula Electric @ Berkeley — Sep. 2026 – Present
General Member — *Berkeley, CA*

- Designed a differential mount for an 8.35 kN bearing load, sizing Grade 8 fasteners and verifying it with static FEA
- Developed a slotted idler chain tensioner and 4130 steel jacking bar, presenting a 15-slide design review to a panel

UAV@Berkeley — Sep. 2025 – Dec. 2025
Airframes Subteam — *Berkeley, CA*

- Researched and proposed the SD7037 low-Reynolds-number airfoil, adopted by the team for max VTOL cruise L/D
- Built and flight-tested a 2 ft span glider, tuning wing sizing and CG placement for a 53 ft hand-launched glide

Sigma Chi Fraternity — Sep. 2025 – Present
Risk & Rush Chairman — *Berkeley, CA*

- Established and upheld risk mitigation protocols for a 48-person organization, overseeing crisis and event safety
- Managed a $5,000 recruitment budget and strategy to drive membership growth in compliance with Nationals

Technical Skills & More

Engineering: DFM, GD&T, Thermal & Structural FEA, Root Cause Analysis, Trade Studies, Load Path Analysis
Software: SolidWorks, Fusion 360, Onshape (CAD); SolidWorks Simulation (FEA); MATLAB, Python
Hands-On: Rapid Prototyping, 3D Printing (FDM), Sheet Metal Design, Hydraulic Systems, Weight & Balance
Honors: Cal Alumni Association Leadership Scholar
Interests: Aviation, Rock Climbing, Brazilian Jiu-Jitsu, Hiking, Traveling, Gym
